Additional Information:

* The RTI Education Technicians each work with two classes. They provide Tier II instruction to small groups in reading and math, as well as instructional support to the general population. Our ed. techs. are highly trained in intervention techniques, and work closely with the classroom teachers and with the RTI professional staff.

* Projected enrollments for Grade 1 are based on average new enrollments that we have experienced in the past five years. We generally receive many students who had attended private kindergarten programs.
